

Sage Timeslips

Timeslips turns your time into money.

When do you need Timeslips?

As a service-based business, you bill for your time. Whether your professionals record time through scribbled notes on a day planner or through limited time tracking in your accounting software, the challenges are the same. How do you know your company's time is being captured fully and accurately? Is time capture quick and easy for your busy professionals, even when they are out of the office? And finally, is billing timely, convenient, and easy for your clients to understand?

- Timeslips is the easiest way to capture all of your organization's billable and unbillable time and expenses, whether your timekeepers are in the office or in the field.
- Generate just the exact bills you need, anytime, with highly customizable billing parameters.
- Configurable to allow tracking of time and expenses while away from the office with remote solutions.
- Scalable to add capacity so more employees can track time and billing, payment entry, reporting and more.

Why Warnick Consultants?

Warnick Consultants is one of a very few professional staffs in Central Ohio who is certified in Timeslips. Our consultants have the expertise to help you set up and use this powerful application to achieve the fastest return on your investment. We are experts at customizing your reports to make them easily available and we can efficiently customize the user interface based on your business needs.

Most importantly, Warnick Consultants will evaluate your business to help you determine if Timeslips is the right choice for your timekeeping. If it isn't, we will help you find the choice that is.

Some of the features we like best:

- Smart time and expense entry allows users to enter individual time slips, enter time with Time Sheet Entry, or use TS Timer to track time throughout the day. You can also create your slips from any email capable device
- Flexible bill generation offers LEDES 98 and Legal Solutions Suite electronic billing, multiple billing arrangements for each client, split billing, and extensive filtering capabilities
- Customization of the user interface based on your business needs
- Convenient electronic payment options
- Complete accounts receivable and retainer/trust account management
- Extensive custom fields
- Customizable bill creation and design
- Insightful reporting and management
- Easily increase capacity with additional licenses
- Networking options

Why do we prefer Timeslips over alternatives?

There are a lot of applications, including QuickBooks®, that let you track basic hours logged against specific jobs. None of these alternatives have the powerful features of Timeslips that let you manage every step of the billing cycle in a simplified, streamlined workflow.

Timeslips offers flexible billing arrangements, customized billing for each client, and centralized control over the billing process for easy access, status tracking and management.

Would you like more information?

Call Warnick Consultants. We'll be happy to schedule a Timeslips demonstration or to review your existing Timeslips processes. Either way, we are skilled in helping you turn your time into money.

What are my options?

Sage Timeslips is an industry-leading time and billing solution that enables businesses to manage every aspect of the time-tracking and billing cycle effectively and efficiently. Easy to learn and use, Sage Timeslips helps capture time quickly and accurately and offers simple bill creation and seamless payment tracking—all leading to greater productivity and increased profitability.

Ideal for companies with multiple users who access networked data simultaneously, the network editions of Sage Timeslips come with standard multi-user network licenses. Additional licenses may be added to extend Sage Timeslips beyond the standard number of users.

Expert guidance and proper training are essential to making these systems work for you.

If you are already using Timeslips, Warnick Consultants offers skilled training and support services to make sure you are utilizing all of the many features efficiently and effectively for your business.
